Copyright in relation to this Thesis

Under the Copyright Act 1968 (several provision of which are referred to below), this material must be used only under the normal conditions of scholarly fair dealing for the purposes of research, criticism or review. In particular no results or conclusions should be extracted from it, nor should it be copied or closely paraphrased in whole or in part without the written consent of the author. Proper written acknowledgement should be made for any assistance obtained from this material.

Under Section 35 (2) of the Copyright Act 1968 'the author of a literary, dramatic, musical or artistic work is the owner of any copyright subsisting in the work'. By virtue of Section 32 (1) copyright 'subsists in an original literary, dramatic, musical or artistic work that is unpublished' land of which the author was an Australian citizen, an Australian protected person or a person resident in Australia.

The Act, by Section 36 (1) provides: 'Subject to this Act, the copyright in a literary, dramatic, musical or artistic work is infringed by a person who, not being the owner of the copyright and without the licence of the owner of the copyright, does in Australia, or authorises the doing in Australia of, any act comprised in the copyright'.

Section 31 (1) (a) (i) provides that copyright includes the exclusive right to 'reproduce the work in a material form'. Thus, copyright is infringed by a person who, not being the owner of the copyright, reproduces or authorises the reproduction of a work, or of more than a reasonable part of the work, in a material form, unless the reproduction is a 'fair dealing' with the work 'for the purpose of research or study' as further defined in Sections 40 and 41 of the Act.

Section 51 (2) provides that "Where a manuscript, or a copy, of material of other similar literary work that has not been published is kept in a library of a university or other similar institution or in an archives, the copyright in the material or other work is not infringed by the making of a copy of the material or other work by or on behalf of the officer in charge of the library or archives if the copy is supplied to a person who satisfies an authorized officer of the library or archives that he requires the copy for the purpose of research or study'.

ABSTRACT

What was once the preserve of a ‘green’ social organisational fringe, Corporate Environmental Management (CEM) and Corporate Environmental Reporting (CER), have increasingly become a core business strategy. Research studies in this arena have been centred on industrialised nations (e.g., Guthrie and Parker, 1990), and until recently, comparatively sparse focus on developing nations (Belal, 2000), particularly in empirical studies on CER in the People's Republic of China (PRC).

As the most populous nation on earth with one fifth of humanity (1.3 billions), China's astounding economic growth and resource consumption (Economist, 2005), provide 'telescoping' lessons in understanding the embracing of CEM and CER in rapidly developing countries. Motivated by China's unique institutional structure and embryonic stage of environmentalism (Luo and Yuwen, 2001; Chan and Welford, 2005), this field study explored the 'greening' phenomena of CEM and CER as perceived by senior managers in Shanghai.

Utilising a modified grounded research approach (Strauss and Corbin, 1990; 1994; Whiteley, 2004), the constructivist ontology was chosen to penetrate the social context of the companies interviewed. Grounded in the data and applying interpretive epistemology, this qualitative research elucidated our awareness about the normative assumptions underpinning CEM and CER in Shanghai. The emergent model illuminated our understanding of how Chinese institutions and senior individuals within enterprises responded to the greening challenges, and how senior managers matched their personal beliefs with perceived CEM and CER.

The results in this study indicated that CEM and CER were influenced and/or constrained by formal institutional rules (e.g., environmental policies and laws) and informal cultural institutional norms (e.g., Guanxi, trust and secrecy). The findings resonate well with institutional theoretical constraints (Powell and DiMaggio, 1991; Fogarty, 1992a) and cognitive dissonance theory (Festinger, 1962). This is attributable to the dilemma of balancing the 'yin and yang' of long term environmental sustainability and short term economic growth.
CERTIFICATION

This thesis is submitted in fulfilment of the requirements of the degree of PhD, in the Graduate School of Management, Macquarie University. This represents the original work and contribution of the author, except as acknowledged by general and specific references.

I hereby certify that this has not been submitted for a higher degree to any other university or institution.

Student’s Name: Anna Lee Rowe

Date: 12 June 2006
ACKNOWLEDGEMENTS

Dedicated to the sweet memories of Mum and Dad:

Teresa and Francis Lee

(my first educators)

I wish to express my gratitude to several individuals who have made significant contributions to my doctoral journey. Thanks to the respondents who have participated in the field research in Beijing and Shanghai, PRC.

Special thanks to my mentors and dedicated supervisors: Professor James Guthrie (Macquarie Graduate School of Management and University of Sydney) and Professor Alma Whiteley (Graduate School of Business, Curtin University), for their unstinting support and patience.

I am also indebted to Professor Margaret Nowak and many collegial colleagues of Curtin University, Macquarie GSM, Shanghai University of Finance and Economics, Asian Pacific Interdisciplinary Research in Accounting Conference, Asian Pacific Conference on International Accounting Issues who have offered invaluable help.

My profound thanks to my family who have given me constant love and encouragement throughout this thesis – my (very much missed) parents, brother Joe Lee and ever so enduring and understanding husband, Bill.
